

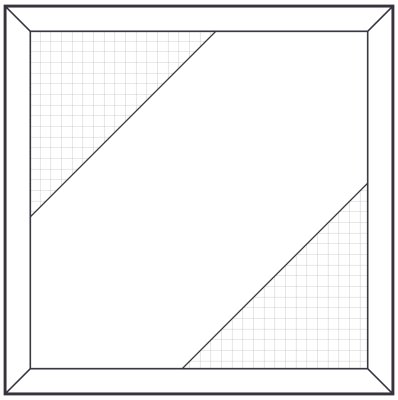

Fig. 1: Equalizer Corner-Release Screen elevation & frame cross-section

The Rusco Equalizer trades a hinged frame for a compact corner-release latch: pull the corner-mounted pin and the whole screen releases for quick egress or cleaning, no hinge hardware to maintain. Sized independently by width and height from 12" to 48", so it isn't limited to square openings.

✓ A lighter, faster-release option for smaller window openings that don't need a full hinged screen

✓ Same certified 800 lb stainless mesh as the rest of the Rusco window screen line

✓ Simple corner-latch hardware with fewer moving parts to maintain

AT A GLANCE	
Width Range	12" to 48", independent of height
Height Range	12" to 48", independent of width
Frame	.024" roll-formed G90 steel
Mesh	304 stainless, .028" wire, 12x12, 800 lb tensile
Models	#2200, #3300, #3500
Colour	Black or white

1 FEATURES

- Frame: .024" roll-formed G90 steel
- Screen cloth: 304 stainless steel, .028" diameter, 12" x 12" weave, 800 lb high-tensile strength
- Latch: zinc-plated 1/4" steel latch pin and button with brass spring, corner-release design (no standard hinge)

2 SIZING

- Minimum width: 12"
- Maximum width: 48"
- Minimum height: 12"
- Maximum height: 48"
- Width and height are set independently within that range, not limited to square openings

3 AVAILABILITY

- Available with Models #2200, #3300, and #3500
- Colour: black or white
